Capacitive sensors for aggressive, corrosive media | KNM-20

- Mounting sleeve for level monitoring with capacitive sensor
- Chemical-resistant assembly sleeve for KNK-Series
- Assembly sleeves are mounted in the tank - the sensors record the filling level through the assembly sleeve
- For the rapid replacement of the filling level switches during running operations without assembly effort
- For use in aggressive media

G3/4

TYPE	KNM-20
Product ID	P40500
Compressive strength	3 bar
Material housing	PTFE
Drehmoment	1 Nm
Description	mounting sleeve for quick and easy change of capacitive levelswitches
